(304) 982-1104

Biography

Selena Lewis is an Environmental Consultant with a B.S. in Mining Engineering and has experience in both underground mining operations and coal preparation plants, working primarily with maintaining safety measures and ensuring efficient day-to-day operations. She has worked with environmental departments and consulting companies focusing on stream and pond sampling to maintain compliance with current permits and for future water permit applications. She has experience with groundwater monitoring well sampling, air sampling in relation to asbestos monitoring, and data analysis and research, specifically pertaining to due diligence projects. She is skilled in technical writing, including project reports and permit drafts, R13 (general and individual) and Title V air permit application preparations, as well as the WVDEP's Document Management Search and Electronic Submission Systems.
